Co-Sponsored by AFT-CT

TEACH, Teachers Are Talking, Is the Nation Listening brings an important perspective to the national education debate that is currently being dominated by a corporate led agenda to privatize education and blame teachers for everything that is wrong with education in this country. This documentary takes on many questions about No Child Left Behind, high stakes testing, unequal distribution of education resources, and schools dominated by data driven curriculum instead of providing an education that is dynamic, creative, exciting, and joyful.
